

Dream. Bigger.

Kapture is where design, technology, hardware, software, business and branding come together.

Where **design, tech and build** come together.

Welcome to **Kapture**. We are a design and technology company that started in 2013 with a student's camera in Gweru, Zimbabwe. Today we design brands, films and software, and the spaces, structures and systems they live in.

We work where design, technology, hardware, software, business and branding meet. We plan it, build it, connect it and keep it running.

This is our world. **Dream bigger.**

We design things that **get built.**

Kapture is no longer a flat print design agency. We design in 3D, solve real-world problems, integrate the technology and run it long term.

01

Design

Brand, space, structure and software, designed together and modelled in 3D before anything is made.

02

Build

We fabricate, print, install and fit out: from signage and interiors to steel structures and scale models.

03

Integrate

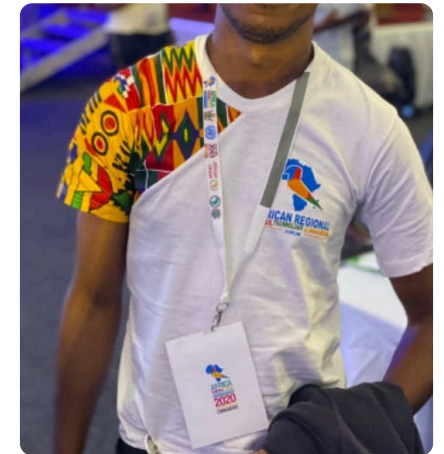

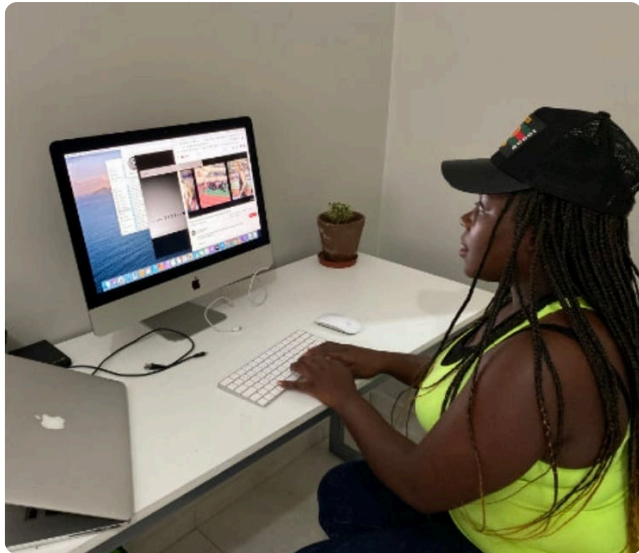

We connect hardware and software: Starlink, networks, cameras, sensors, payments and AI.

04

Run

We stay on to maintain, monitor and improve what we built, for as long as it runs.

Real people. **Real work.**

Kapture crews on shoots, edits, builds and installs in Zimbabwe.

Kapture at a glance.

Founded	2013 in Gweru, Zimbabwe, as Kapchure

Our story.

2013 · Gweru

Kapchure is born.

Rodney Manyepa, a first-year media student at Midlands State University, starts making photos, video and design for his university and businesses in Gweru.

2015 · Harare

KAPTURE!

Kapchure becomes Kapture on 20 January 2015 and opens for business on 1 February with three friends: Rodney, Tino and Leo. People know them for photography first.

2016 · Harare

Into print.

Kapture launches magazines for Harare's shopping destinations, including The Villager and the Arundel Shopper, and starts documentary work.

The studio years.

February 2020 · Victoria Falls

On a continental stage.

Event branding, signage and large-format print for the Africa Regional Forum on Sustainable Development, printed in-house and installed on site.

July 2020 · Harare

We built the studio ourselves.

No supplier had what we needed, so the team built a photo and video studio by hand from local materials, and filmed it for our first upload.

August 2020

First shoot. Zero budget.

An uncommissioned TV spot for Exide batteries, shot on a Sunday to test the new studio. Exide went on to commission a real TV commercial and print.

A decade of creativity.

 2021

Telling African stories.

TV commercials, corporate films, a school-sport media channel for Kyros Sports, music videos, the Kapture Content Factory and a free Kreative Academy on YouTube.

 2022

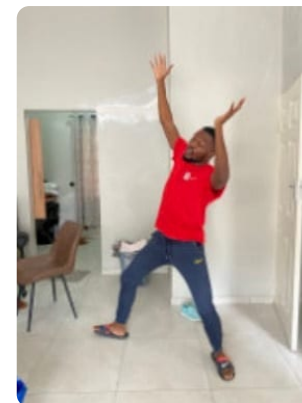

We love making cool stuff.

Our 32-page profile presents Kapture as a full-service creative agency with ten disciplines, from social content and film to sound, talent and print.

 2024 · Johannesburg

Kapxure, ten years on.

Kapxure (Pty) Ltd is registered in South Africa, and the Kapxure edition marks a decade with a simple promise: We design. Real good. Real fast.

Rebrand Africa.

2025

One sun. One yellow dot.

A new identity in black, white and Kapture yellow.
We move our builds onto Wix Studio and headless platforms, and start turning what we know into products.

2026 · United Kingdom

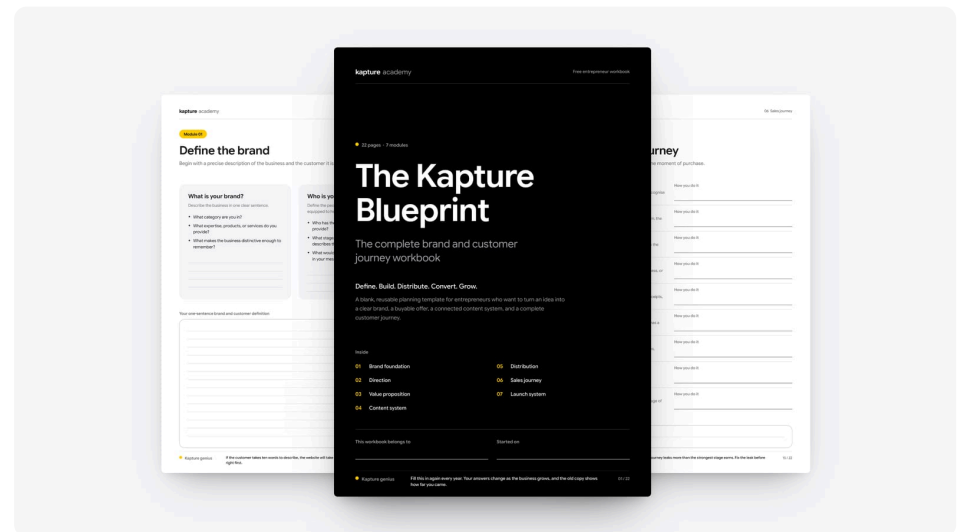

Africa is ready.

We tell the Kapture story from the UK. Kapture Studio and kurongeka.com go live in October, and our motto becomes Dream. Bigger.

From here

From design to delivery.

Kapture now designs things that are built and manufactured: interiors, steel structures, scale models and connected systems that we install and run.

Then and **now.**

2013

Kapchure · Gweru

2026.

Kapture · Harare to the United Kingdom

Team	One first-year media student with a camera.	A core team in Harare, Johannesburg, Lusaka and the UK, with a bench of designers, developers, filmmakers, engineers, fabricators and installers.
Work	Photography, video and design for a university and local businesses.	Brands, films, software, spaces, steel structures, scale models and connected systems.
Reach	Gweru, Zimbabwe.	76 organisations in five countries. 52 client websites, 109 films and more than 100 builds.

Mark

Our philosophy.

The world doesn't have an Africa problem. **It has a bridge problem.**

For five hundred years Africa has been described by people who never asked it anything. Both sides want the trade. Neither side has the bridge. That is a design failure, and design failures are fixed by designers.

So we design the bridge: brands that carry their own story, buildings and systems that work in African conditions, and platforms that let African businesses trade with the world.

From The Kapture Story, 2026

Our principles.

Solve the real problem.

Every piece of work has to fix something. We never paste a generic answer onto a specific problem.

Build what lasts.

We design for African conditions: heat, dust, distance, load-shedding and patchy signal.

Keep our word.

We honour our commitments, and we stay to support what we build.

Ship on time.

We started as a 24-hour studio. Deadlines are promises, come hail or thunder.

Stay early.

Early to social, early to digital, early to AI and 3D. We keep learning in public.

Tell our own stories.

Generational wealth starts with generational intelligence, and that starts with Africans telling their own stories.

What we do.

Twelve practices, one team. From the first sketch to the system that runs it.

Design

- Brand and identity
- Film, photo and sound
- Web, apps and platforms

Build

- Spaces and interiors
- Steel and structures
- 3D design and scale models

Integrate

- Connectivity, power and security
- Systems, AI and automation
- Payments and business software

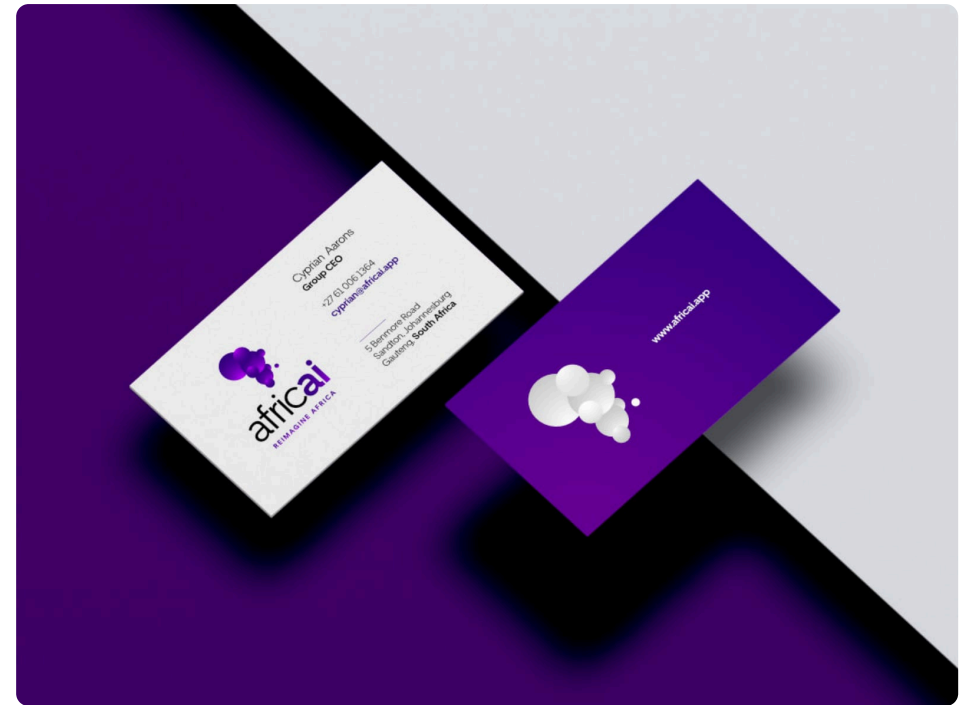

Run

- Support, monitoring and maintenance
- Events, broadcast and live
- Academy and Foundation

Brand and identity.

Your brand is the first thing customers, investors and partners see. We build identities that are simple, memorable and ready for every surface, from a business card to a building.

- Brand strategy and positioning
- Logo and identity toolkits
- Company profiles, pitch decks and proposals
- Packaging and labels
- Magazines, books and annual reports

Film, photo and sound.

Moving pictures are our language. We script, shoot, edit and score commercials, documentaries and series, and we photograph people and products in the best light we can build.

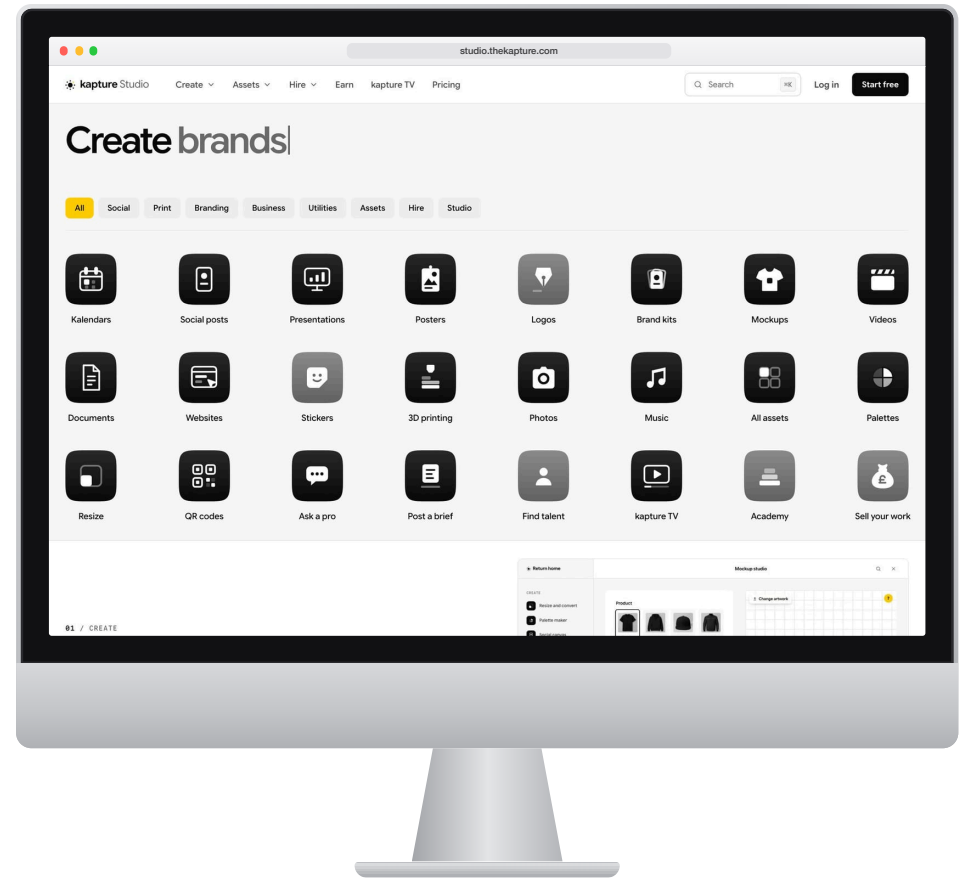

- TV commercials and corporate films
- Documentaries and branded series
- Product, portrait and event photography
- Motion graphics, 3D and animation
- Jingles, voice-over and music production

Web, apps and **platforms.**

We build websites, apps and business systems that load fast, sell well and are easy for your team to run, connected to the payments Africans actually use.

- Websites on Wix Studio and Wix Headless
- Web and mobile apps
- Online stores and payments
- Bookings, memberships and customer records
- Dashboards and internal tools

Spaces and interiors.

We design rooms people remember and businesses can run, complete with the signage, furniture, lighting and technology inside them.

- Receptions, offices and boardrooms
- Restaurants, cafés, shops and showrooms
- Clinics, classrooms and studios
- Exhibition stands and container shops
- Wayfinding, signage and lighting

Steel and structures.

Our forward thrust

We design steel structures in 3D, produce fabrication drawings and bills of quantities, and manage the build with trusted fabricators.

- Gates, fences and guard houses
- Sheds, warehouses and workshops
- Outhouses, ablution blocks and site offices
- Service station canopies and kiosks
- Farm, mining and fuel-depot structures
- Container conversions and pop-up stores

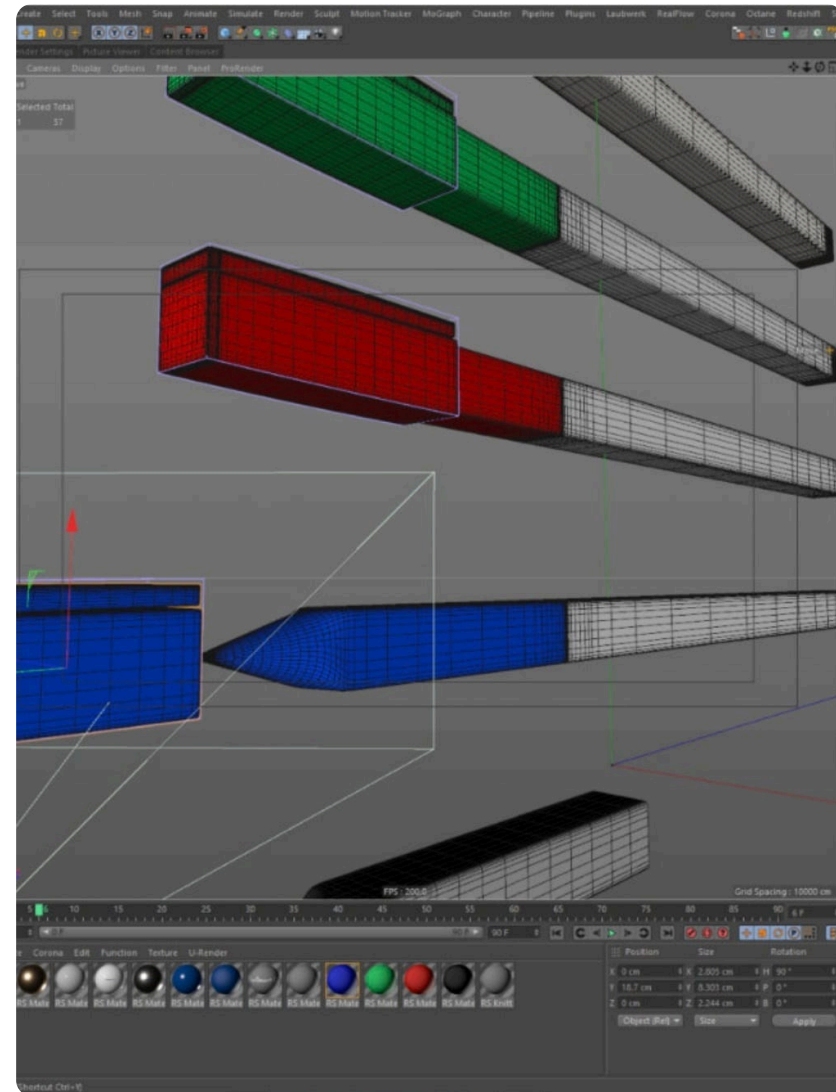

3D design and scale models.

Specialist practice

We are building a specialist practice in accurate, 3D-printed scale models for planning, investment and sales, and we design and print products, parts and prototypes.

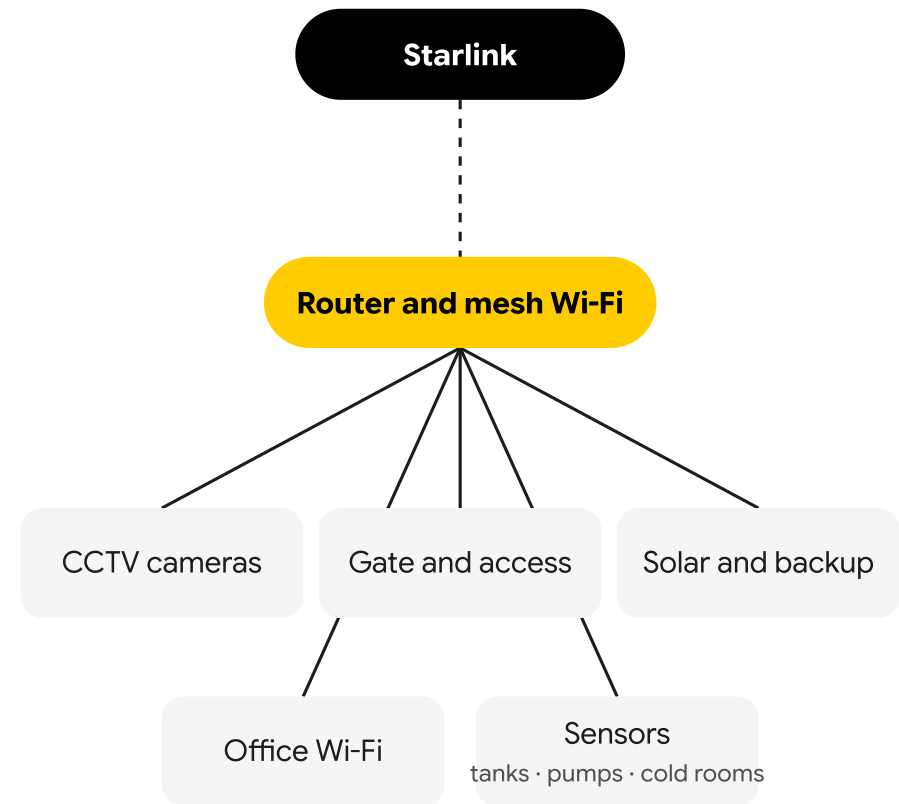

- Housing estate and building models at true scale
- Factory, mine, airport and infrastructure models
- 3D visualisation and virtual walkthroughs
- Product design, prototypes and parts
- 3D scanning, CNC and laser cutting

Connectivity, power and **security.**

We get remote sites online, powered and protected, and we keep them that way.

- Starlink set-up and site connectivity
- Mesh Wi-Fi and site networks
- CCTV, access control and gate automation
- Solar power and backup systems
- Remote monitoring and support

Systems, AI and automation.

We connect hardware and software into custom systems that fit how a business actually works, in any industry, then add AI where it saves time.

- Hardware and software integration
- IoT sensors and remote control
- Fleet and asset tracking
- AI assistants and workflow automation
- Digital transformation and training

People

Owners, managers and staff, on phone and desktop

AI

Alerts, reports, assistants and automation

Software

Apps, dashboards, payments and records

Network

Starlink, mesh Wi-Fi and secure access

Hardware

Sensors, cameras, pumps, gates and power

From radio silence to a **running farm**.

A farm with no signal, no data and no remote control. This is how we take it from zero to a system the owner runs from a phone. The same method works for mines, depots, clinics and schools.

01

Survey

Site visit, needs, distances, power and risks.

02

Bill of quantities

Equipment list, costs and a clear timeline.

03

Install

Starlink, solar, mesh Wi-Fi, sensors, cameras and gate.

04

Software

One app for pumps, tanks, cold rooms, security and staff.

05

Train

The farm team learns to use and look after it.

06

Run

Monitoring, maintenance and upgrades, long term.

Events, broadcast and **live.**

We brand, build, film and stream events, from conferences and expos to concerts and sport.

- Event branding, stages and installs
- Live streaming and broadcast
- Sports coverage and highlights
- Podcast and studio production
- Drone filming and aerial mapping

Academy and Foundation.

There are not nearly enough trained African creatives and technicians. We share our methods through courses, masterclasses and free tutorials, and the Kapture Foundation runs free programmes with mentoring for young people.

- Courses and masterclasses
- Founder programmes
- Free training for young people
- Team training and handover
- Tutorials on our channel

Industries we **serve.**

The same team designs, builds, connects and runs work for very different sectors.

Agriculture

- Farm offices, packhouses and sheds
- Starlink, sensors and irrigation control
- Brand, packaging and online sales

Retail and hospitality

- Restaurants, hotels, lodges and shops
- POS, menu screens and guest Wi-Fi
- Brand, photography and online stores

Mining

- Site offices, camps and workshops
- CCTV, access control and asset tracking
- Site networks and safety signage

Healthcare and care

- Clinics, pharmacies and care homes
- Booking, records and care software
- Reception, wayfinding and patient comms

Fuel and energy

- Service station canopies and forecourts
- Tank monitoring and solar backup
- Brand, signage and payments

Education

- Schools, campuses and labs
- Campus networks and smart classrooms
- Learning platforms and media studios

Industries we **serve.**

Logistics and warehousing

- Warehouses, depots and yards
- Gate automation, weighbridges and fleet tracking
- Quote, booking and tracking systems

Aviation and transport

- Lounges, counters and terminals
- Airport and fleet scale models
- Booking, ground handling and in-flight systems

Property and construction

- Scale models of estates and buildings
- Show houses, marketing suites and hoardings
- Estate security, access and networks

Events, media and faith

- Stages, studios and halls
- Live streaming and broadcast
- Campaigns and community platforms

Corporate and finance

- Receptions, offices and boardrooms
- Networks, AV and room booking
- Brand, annual reports and investor decks

Government and NGOs

- Field offices and programme sites
- Data dashboards and reporting
- Documentaries, reports and campaigns

How we **work**.

01

kapture

We find what the brand, site or problem actually is: the people, the promise and the constraints.

02

kraft

We design and build to a standard that holds up anywhere: identity, film, platform, space or structure.

03

kultivate

We hand over properly, train your team and stay on to support and improve what we built.

04

konnnect

We launch it and connect it: to audiences, partners, markets, networks and systems.

How we deliver **so much**.

A small core team does the work of a much larger one, because we build on systems.

One team, every skill.

Designers, filmmakers, developers and installers plan together, so nothing gets lost between brand, build and tech.

Tested before handover.

Our platforms ship with automated tests: 187 for AWEF, and 204 routes checked for Intaba with zero failures.

Reusable systems.

Every project starts from tested templates, components and checklists that improve with every job.

We stay on.

Maintenance plans, monitoring and training keep what we build running long after launch.

AI in the workflow.

AI agents handle research, drafts, testing and documentation. People make the decisions and sign off.

A trusted bench.

Fabricators, printers, installers and crews in Harare, Johannesburg, Lusaka and the UK.

Made by our own **hands**.

Billboards, window graphics, event builds, steel and studio rigs: printed, fabricated and installed by Kapture crews.

Selected **work.**

Intaba Trading · Zimbabwe

A seed company that leads with the season.

Identity toolkit, a 2026 company profile, season campaigns and a fast website where farmers browse 166 products, four partner hubs and seven supplier programmes.

Delivered: identity, profile, campaigns and website

CP Chemicals · Zimbabwe and Zambia

Designed, built and installed.

For an agrochemical brand selling to farmers, we designed and built a shipping-container Farmer's Shop, then ran billboards from site survey and permits to fabrication and installation.

Delivered: container store, billboards, gazebos and TV commercials

Selected work.

Exide · Chloride Zimbabwe

From spec ad to client.

Our first shoot was a zero-budget demo commercial for Exide, made in 2020 to test a hand-built studio. It got noticed, and Exide commissioned a TV commercial and product print.

Delivered: TV commercial, brochures and flyers

Zimbabwe Music Awards

Celebrating great Zimbabweans.

A brand toolkit, logo pack, sponsorship deck, website and social campaign for the national music awards, built to work on stage, on screen and on every sponsor's banner.

Delivered: brand toolkit, website, sponsorship deck and social

Intaba Trading.

Zimbabwe · Agriculture

Seed and crop protection, in a farmer's pocket. A fast, mobile-first site that works on patchy rural signal.

- 166 products, 4 partner hubs
- Enquiries straight to sales
- 204 routes tested, zero failures

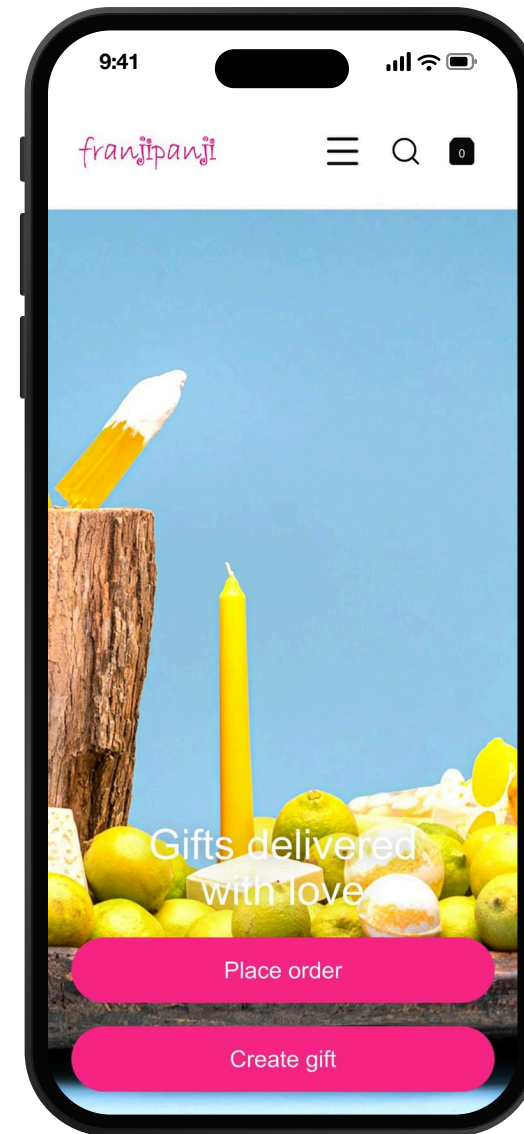

Franjipanji.

Harare • Retail and gifts

Gifts ordered on phones, often for loved ones far away. A custom store with studio photography and local and card payments.

- Custom online store
- 122 products photographed
- Local wallets and cards

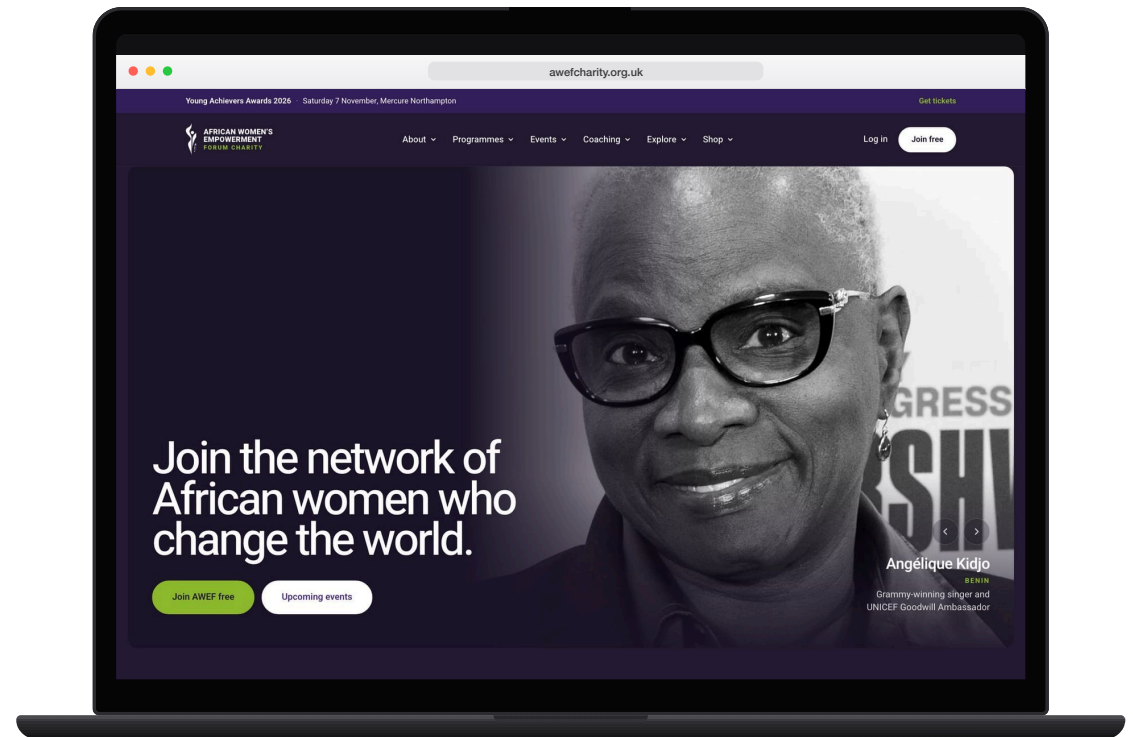

AWEF.

United Kingdom · Charity

A charity platform members use,
not just read: live courses,
member groups and events.

- Courses, groups and events
- Young Achievers Awards 2026
- 187 automated tests

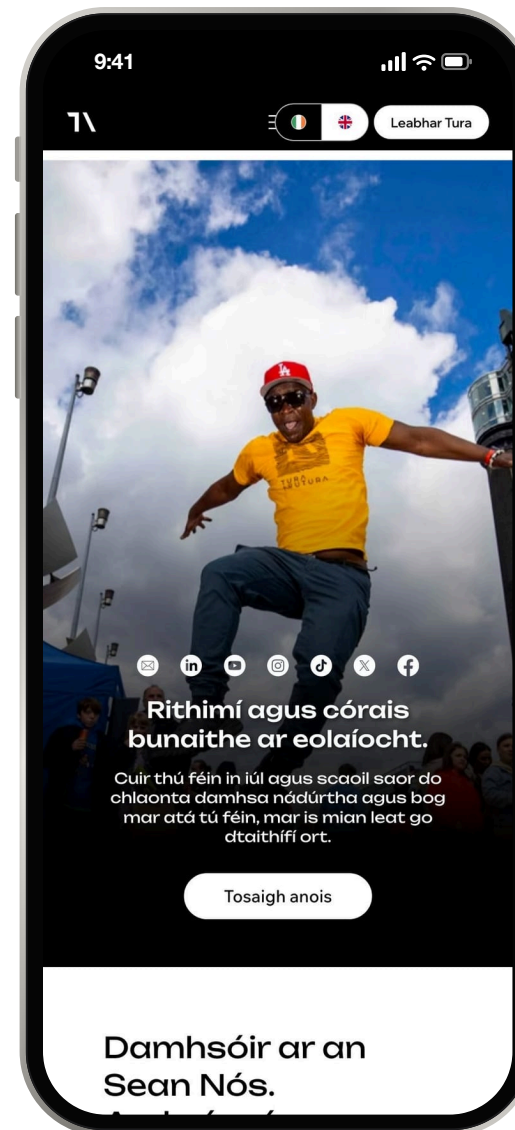

Tura Arutura.

Belfast, United Kingdom · Culture

African dance meets the Irish language. A bilingual, mobile-first home for a Belfast artist.

- Irish and English website
- Stage photography
- The Leap campaign

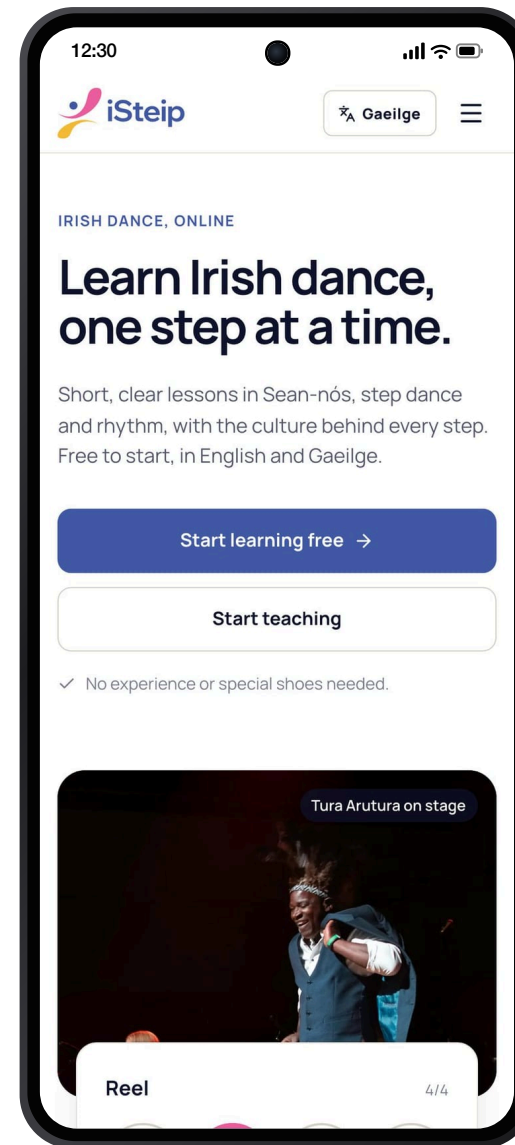

iSteip.

Ireland and Northern Ireland · Learning

Learn Irish dance, one step at a time. A bilingual learning app for web, iOS and Android.

- Short video lessons
- Learner and teacher accounts
- iOS and Android

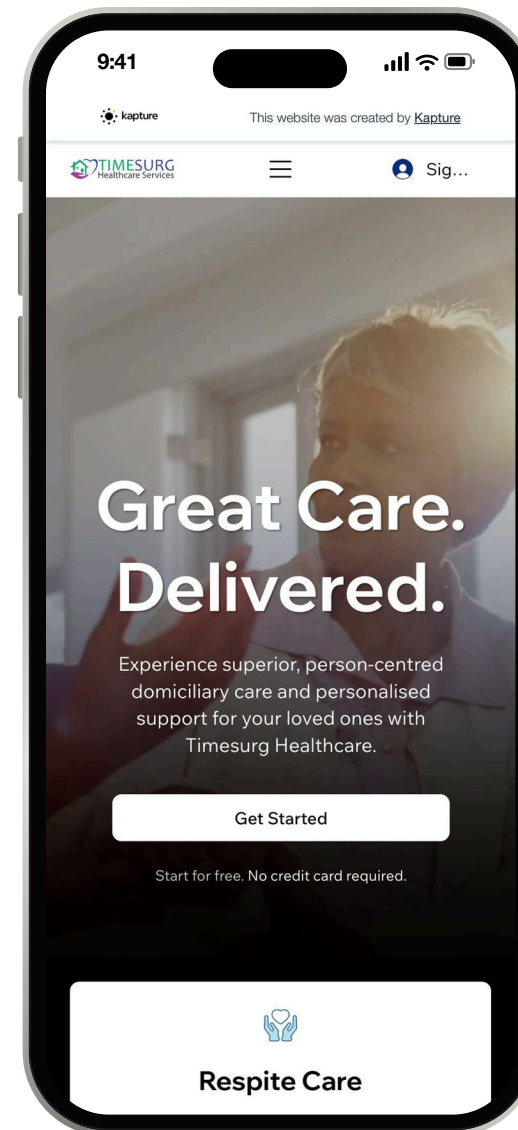

Timesurg Healthcare.

Kent, United Kingdom · Home care

Families search for home care on their phones. A calm, clear website that gets found.

- Website and enquiries
- Logo and leaflets
- Local SEO

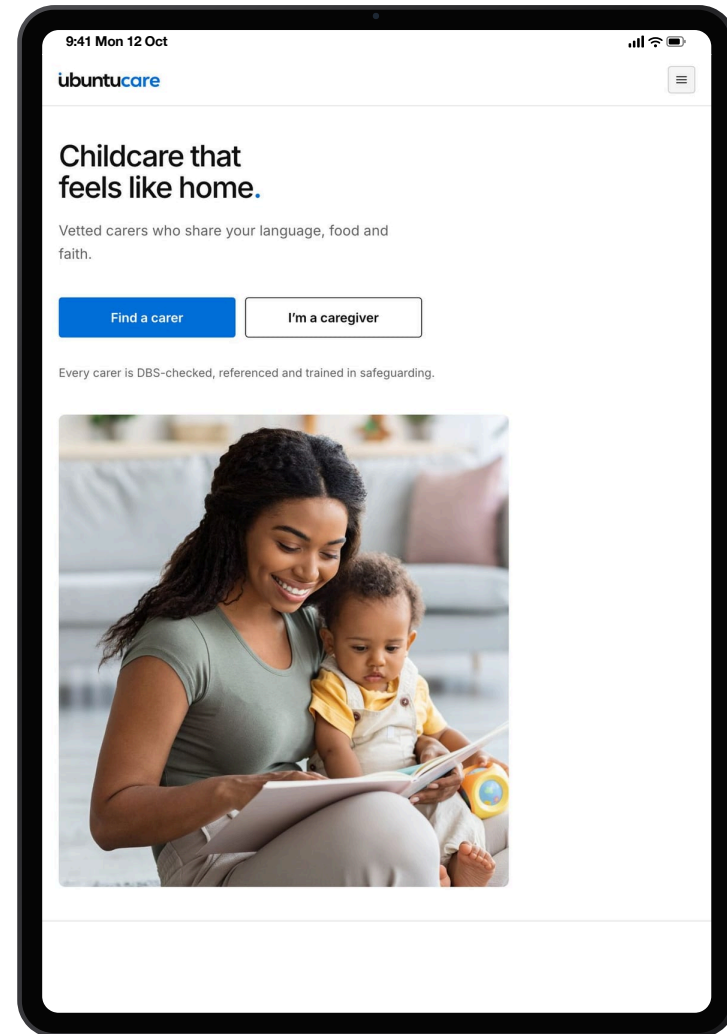

Ubuntu Care.

United Kingdom · Childcare

Childcare that feels like home, for families in the UK diaspora.

- Vetted carer marketplace
- Matching and bookings
- Payments and admin

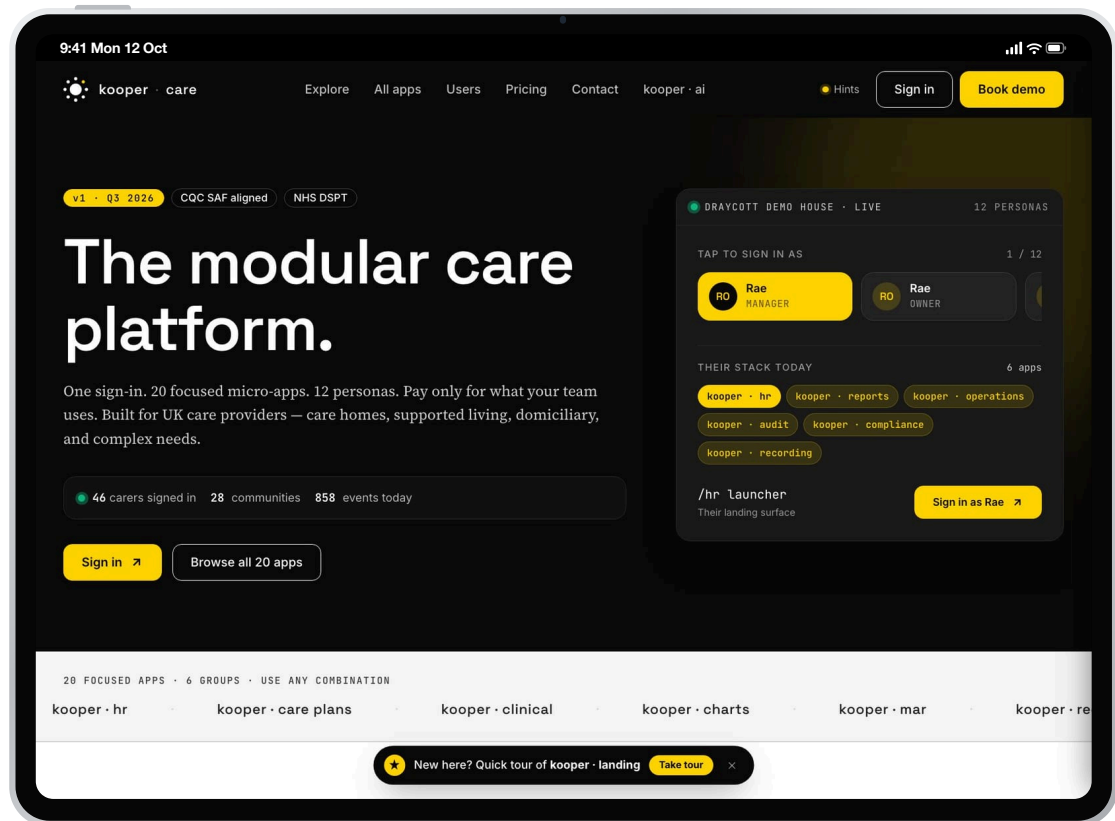

Kooper.

United Kingdom · Care · Kapture product

Care software for carers on their feet, built for tablets on the care floor.

- HR at the core
- Care plans, rotas and records
- In development

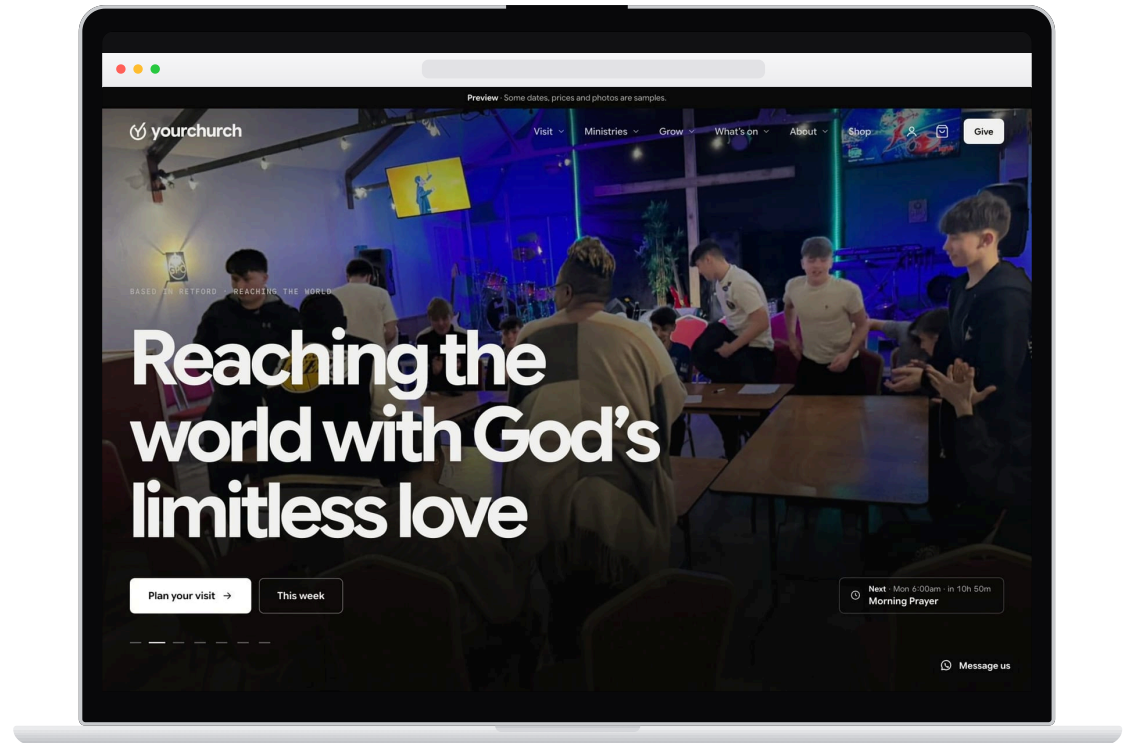

YourChurch.

Retford, United Kingdom · Faith

One home for a Retford church with a global vision: visits, events, giving and ministries.

- Church website and members
- Events and giving
- In preview

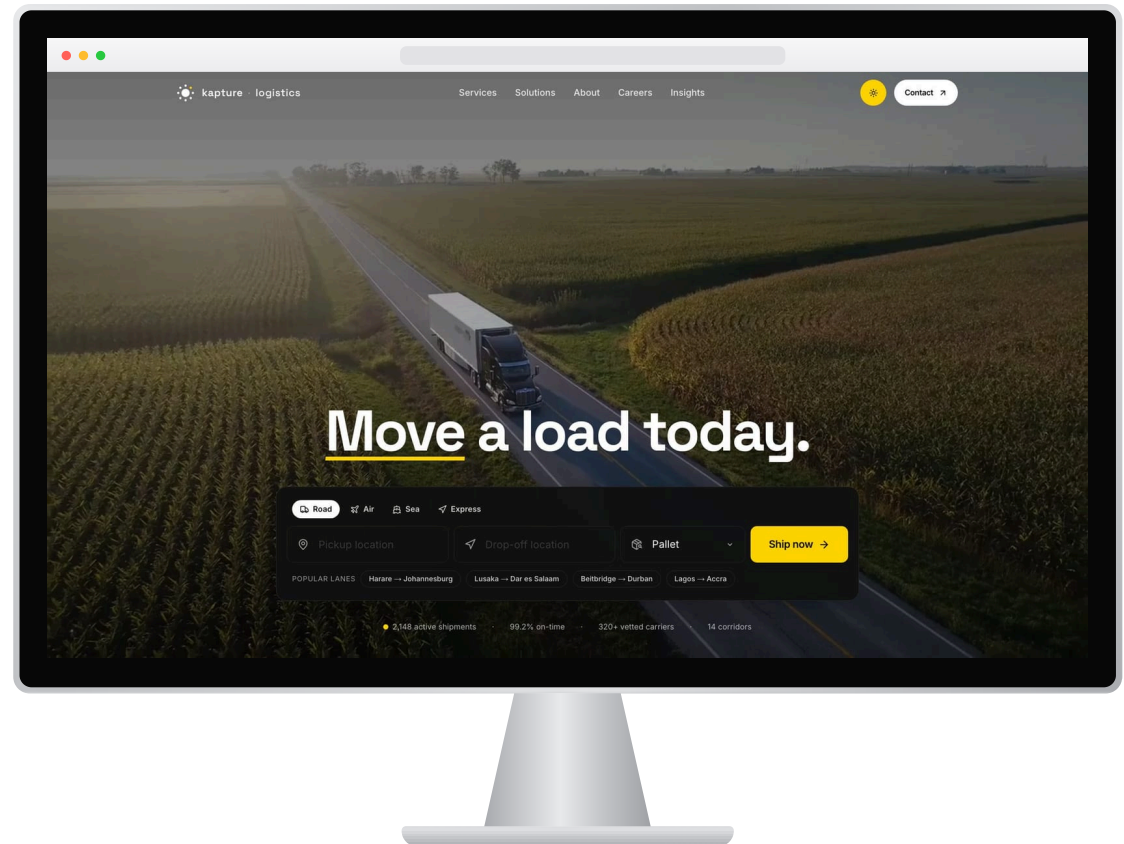

Kapture Logistics.

United Kingdom and Africa · Freight ·
Kapture product

A quote desk for freight operators, ready to brand and launch.

- Instant quotes
- Route and service pages
- Careers funnel

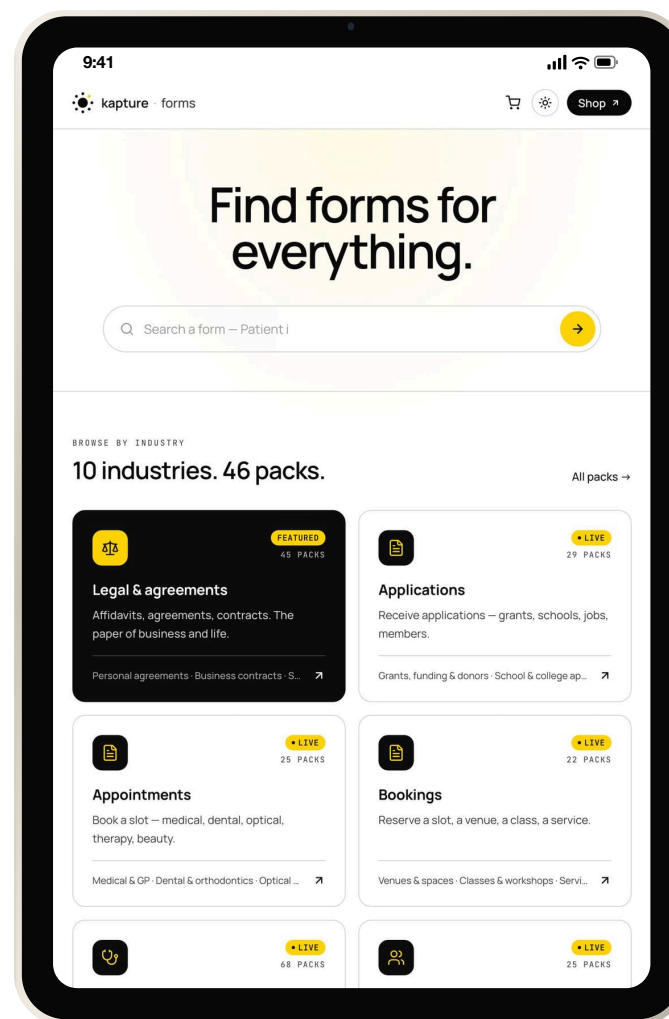

Kapture Forms.

United Kingdom · Regulated sectors ·
Kapture product

Ready-made compliance forms
for ten regulated industries.

- 46 form packs
- Five export formats
- Audit trail

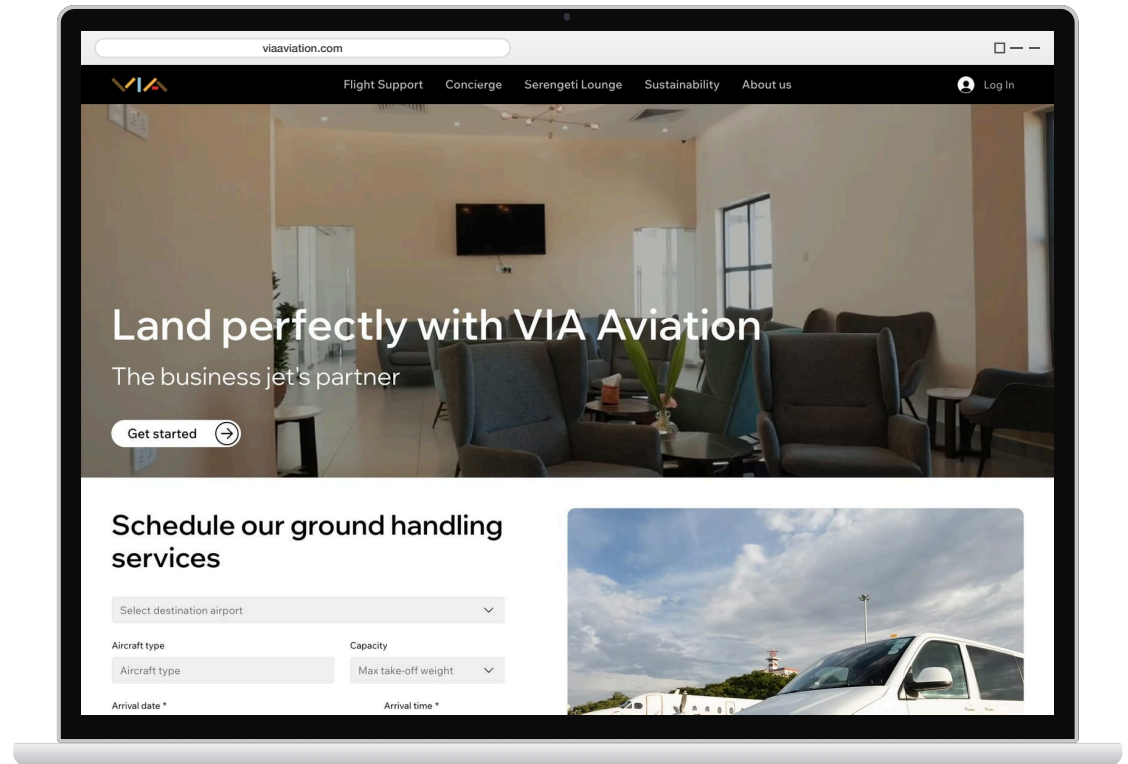

VIA Aviation.

Aviation

Ground handling, booked online,
for business jet crews.

- Brand toolkit
- Web film
- Booking website

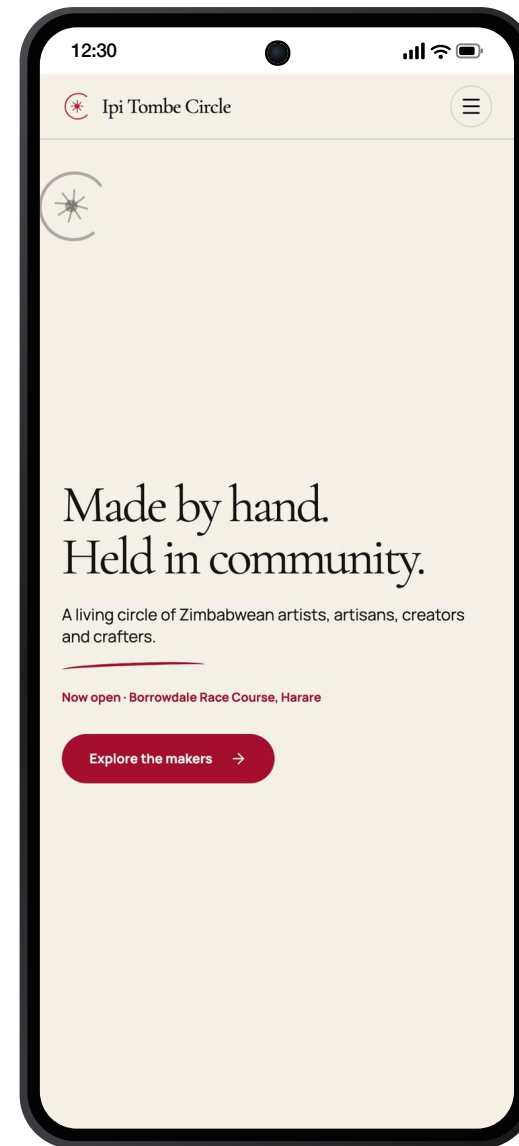

Ipi Tombe Circle.

Harare · Arts and crafts

A home for 97 Zimbabwean makers, and the buyers who find them.

- Identity and launch
- Maker directory
- Sign-in and admin

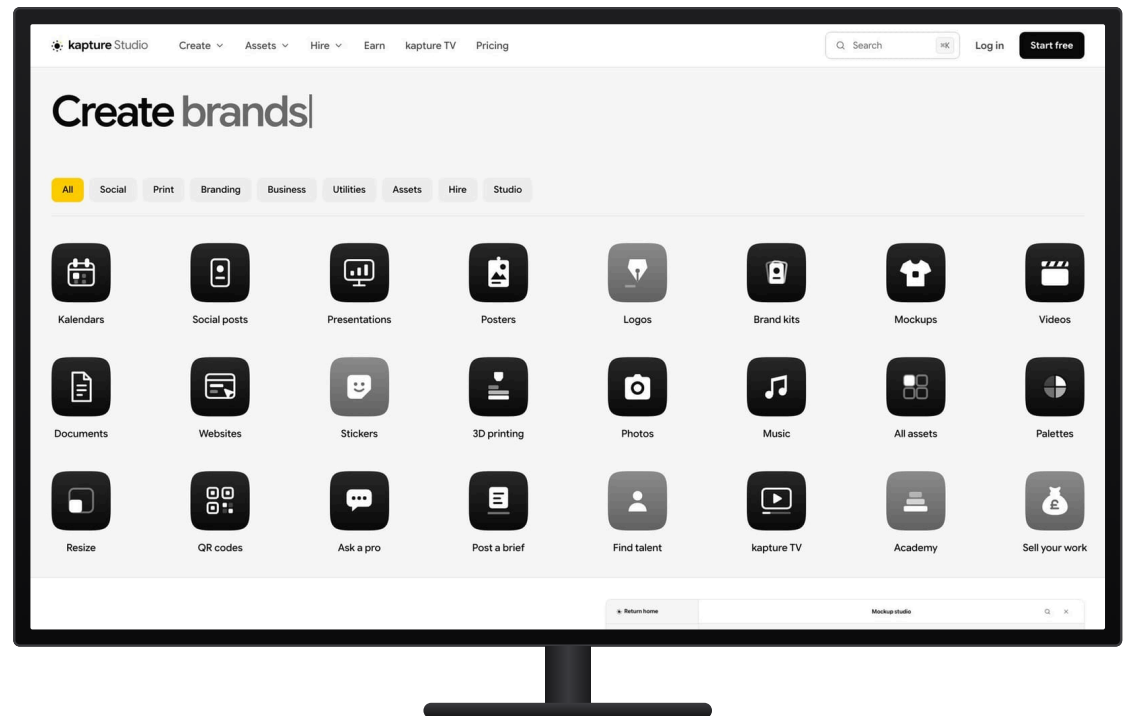

Kapture Studio.

Kapture product · Live

Design apps, asset libraries and Kapture TV, free to start.

- Browser design apps
- 17 asset libraries
- Kapture TV originals

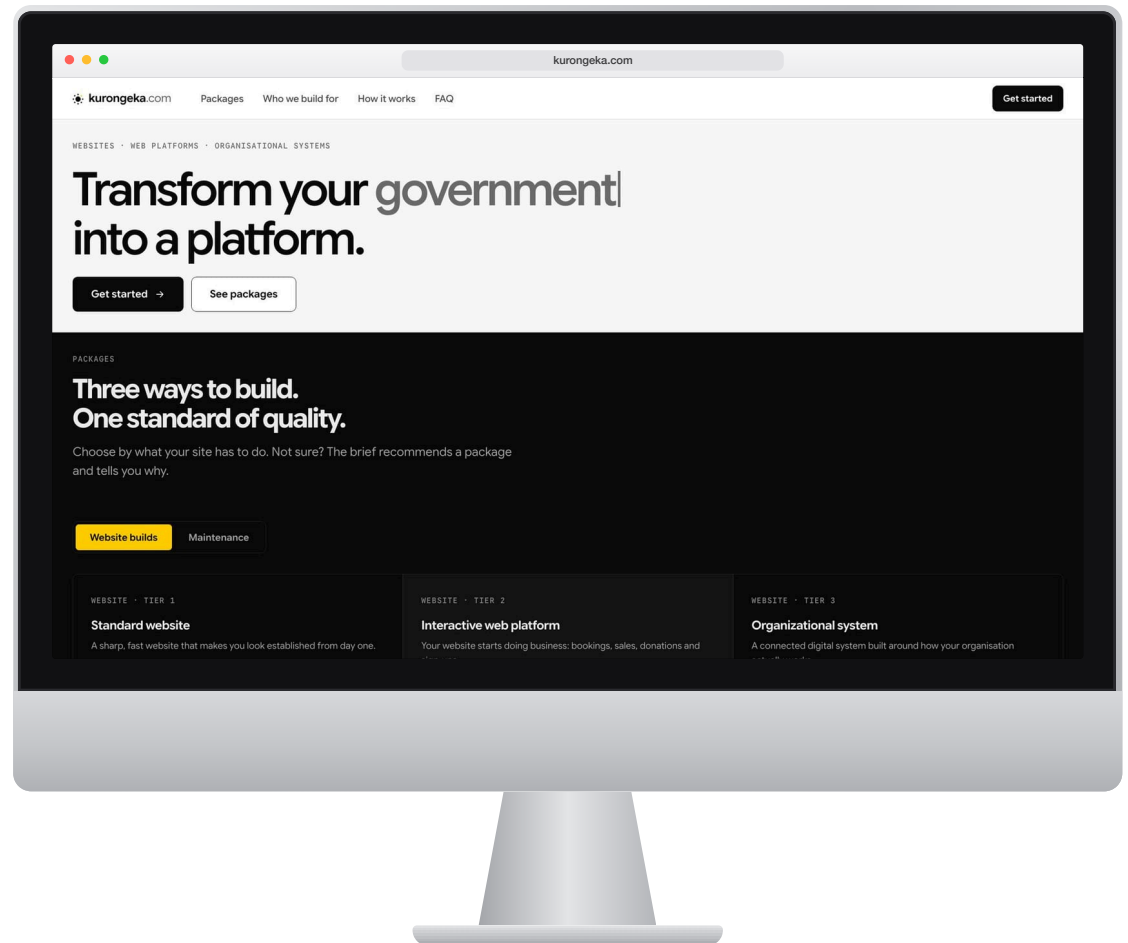

kurongeka .com

Kapture product · Live

Fixed-price websites and
platforms, from brief to launch.

- Fixed-price packages
- Guided brief
- Maintenance plans

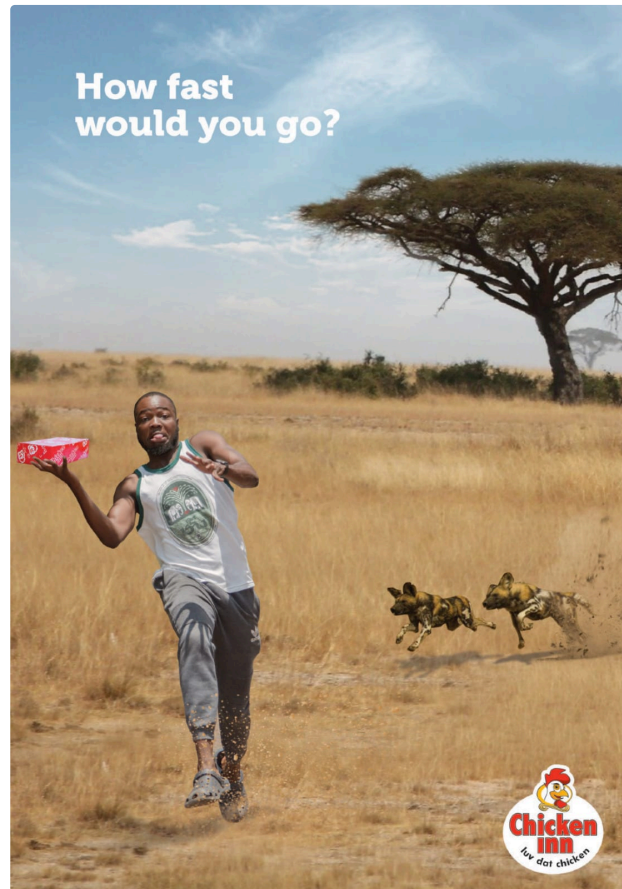

Food and drink.

Our team.

Kapture opened in 2015 with three friends and one camera. Since then photographers, editors, designers, developers, sound engineers, fabricators, printers, riggers, installers and on-screen talent have all worked under the Kapture name.

Today a core team works with a bench of specialists in Harare, Johannesburg, Lusaka and the United Kingdom, supported by AI tools that take on the repetitive work so our people can focus on craft.

How we **build**.

We choose tools and hardware that clients can own, run and repair after we leave.

Web and software

Wix Studio · Wix Headless · Astro · Next.js · Supabase
· Vercel

Native Wix stores, bookings, members and CRM as the system of record.

Design, 3D and media

Affinity · Adobe Creative Cloud · DaVinci Resolve · Logic Pro
· 3D modelling and printing

From identity to animation, renders and printed models.

Payments and data

Stripe · N-Genius · PostgreSQL · Firebase

Local wallets and international cards in the same checkout.

Sites and hardware

Starlink · mesh Wi-Fi · IP cameras · access control · solar and inverters · sensors

Chosen for African conditions, and installed to be maintained.

Where we are **going**.

Design things that get built

From paper to steel.

Interiors, steel structures and connected sites, designed in 3D and delivered on the ground.

Build the bridge

Africa to the world.

Platforms that let African businesses sell to global customers, and global operators work in Africa.

Specialise in scale models

See it before it exists.

Accurate 3D-printed models of estates, factories and airports for planning, investment and sales.

Grow the bench

The next generation.

Kapture Academy and Kapture Foundation train creators, technicians and founders.

Notes.

Dream. Bigger.

Tell us what you are building. We will design it, build it,
connect it and keep it running.
